

IVCJ delivers another knowledge-packed symposium on Healthcare

Upon successfully concluding its **2nd Healthcare Investment Forum on 11th March at J.W Marriott, Mumbai**, IVCJ has lived up to its reputation of unearthing emerging opportunities ahead of time.

Replete with lucrative prospects, the Indian Healthcare industry is finally shedding its image of a stagnant, perfunctory sector. From an investor's perspective, the changing dynamics of the industry have temporarily terminated the search for innovative, newer investment options. The enormous unmet demand within the Healthcare industry has ensured a business opportunity for everyone. However, it is the well-guided investors who are actually at a vantage point in turning prospects into profitable business. The role of IVCJ begins here. Its conference on Healthcare served the ultimate purpose of enlightening eager private players about the intricacies of investing in this space. Covering diverse topics such as, Healthcare Insurance; Benefits of IT usage; New Models of Delivery Systems, coupled with an overview of Government policies, the event was nothing short of a comprehensive information disseminating experience.

A complete set of menu-driven, high-resolution DVDs, covering the entire conference, from the opening session to the closing session of the day, is expected to be out in the market, shortly.
